

Fifth Stieltjes index: 3, 3, then 5 positive zeros

Certified locations for $\gamma_5^{(k)}(a)$ at derivative orders $k = 1, 2, 3$

Detail near 1

All positive zeros

Positive parameter a

Positive parameter a

Markers show exact rational bracket midpoints; each bracket has width 10^{-16} , below plotting resolution.

The global theorem and critical-point sign certificates prove completeness and simplicity.
